Hi everyone! Just a few updates and news before release.

- I've adjusted the release date to be a bit earlier, Radiant Arc will be coming out on May 31st hopefully without delay!

- I've finally figure out how to do put in steam achievements (took way too long XD) and will be implementing them throughout the game, most being achievable through a full playthrough

-Various Balance Changes (upon full release, I will make more detailed bugfix/patch notes)
(since my game involves a lot of characters/skills/builds, balancing can be a bit tricky)

-Bug Fixes/Crashes

-Upon full release, do not hesitate to report bugs through either contacting me through discord or posting on Steam.

-I am actually slowly working on a sequel to Radiant Arc, which takes place 20 years in the future! :)

Thank You all, and I hope you will enjoy Radiant Arc.

-Linky317. **Discontinued Achievements:**

To all players,

Due to complicated reasons, achievements will be removed from Radiant Arc for now. Currently I have discovered that a massive majority of bugs stem from me updating my NW.JS. Many bugs I had before never existed until I updated my NW.JS just for the Steam release. A higher version is required for me to utilize steam achievements however this results in a large amount of nasty bugs such as crashes, list disappearing etc. Currently it is causing me a headache to figure out and for now to ensure a more stable experience, has been removed for now.

Once again, very sorry to all players and I wish you will continue your support for Radiant Arc and my future games.

-Linky317 (Danny). **Now Coming To Steam!:**

After 4 long years of development, my first game Radiant Arc is coming to Steam! I will be taking some more time to fix bugs and polish off parts of the game. I am very excited to share my project and hopefully more in the future!

-Linky317. **Radiant Arc Released!:**

Radiant Arc has finally released!

I am very excited for the public to try my RPG that has been in development for 4+ years.

There may be bugs that crop up but as soon as they are addressed to me, I will try my best to fix them.

As well, any suggestions, balance suggestions, and even ideas for a future game let me know by letting me know in discord or on the game's forum page.

Thank you and I hope you all enjoy a nostalgic JRPG adventure!
