La solución era que se me estaba colgando la base de datos ya que no se estaba instalando con la instrucción sudo apt-get install. Antes el error específico que "El gestor de paquetes no pudo resolver el problema, no se pudo encontrar una solución" y ahora no da error. The present invention relates to a process for producing a sintered body of silicon nitride having a high density and being highly heat resistant. More particularly, the present invention relates to a process for producing a sintered body of silicon nitride having a high density and being highly heat resistant by sintering a silicon nitride powder of a highly porous form obtained by a wet-process, which has been known in the art as a process for producing a powdery silicon nitride having a high density. Silicon nitride has a high sintering resistance and excellent chemical stability, and therefore, it is widely used as a material of high temperature structural parts of various equipments. However, for the parts used at a high temperature, a material having higher strength is required. Since silicon nitride has a relatively low strength, it is necessary to further improve the strength of silicon nitride. For improving the strength of silicon nitride, various attempts have been made. For example, according to JP-B 61-1469, a process is employed in which a nitriding gas is blown to a silicon nitride powder of high density prepared by the wet process, thus obtaining a sintered body of silicon nitride having a high strength. The wet process is a process in which a silicon nitride powder is produced by the reaction between a silicon source and a nitrogen source at a high temperature by the so-called sol-gel process or the like, and is widely employed because of its advantages 82157476af
